SUMMARY:

Full-stack engineer with 1–5 years of experience delivering scalable web applications within the PHP/Laravel ecosystem. Specialized in bridging complex backend architecture with high-fidelity frontend interfaces using Tabler and Bootstrap. Expert in managing the full Software Development Life Cycle (SDLC) to drive technical excellence and performant user experiences.

- **Architected and deployed** custom Laravel applications, implementing robust MVC patterns and Eloquent ORM to ensure 100% data integrity and system modularity.
- **Engineered responsive, mobile-first interfaces** using HTML5, CSS3, Bootstrap, Tailwind, and JavaScript, maintaining strict cross-browser compatibility across all major platforms.
- **Streamlined development workflows** by transitioning from specialized frontend engineering to full-stack ownership, utilizing Git for collaborative version control and CI/CD readiness.

TECHNICAL SKILLS:

Languages & Core: PHP (8.2+), JavaScript (ES6+), HTML5, CSS3, SQL. Frameworks & Libraries: Laravel 10/11 (Eloquent ORM, Gates/Policies, Blade), Tabler UI, Bootstrap 5. Architecture & Security: MVC Design Pattern, Role-Based Access Control (RBAC), Form Request Validation, Model Scopes. Tools & Modern Workflow: Git, Composer, NPM, Vite, Artisan CLI, RESTful API Development. Project Management: Full Software Development Life Cycle (SDLC) management, Agile-aligned development.

PROFFESSIONAL EXPERIENCE:

Eplanet Global Pakistan | Front-End Developer **August 2025 - January 2026**

- **High-Velocity Delivery:** Engineered and deployed 60+ responsive web projects, ranging from landing pages to complex multi-page interfaces, ensuring 100% mobile-first fidelity.
- **Responsive Engineering:** Developed cross-browser compatible interfaces using HTML5, CSS3, and Bootstrap, maintaining a consistent user experience across all major devices.
- **UI/UX Implementation:** Partnered with senior engineering teams to translate high-fidelity design mockups into functional, interactive web features using JavaScript.
- **Quality Assurance & Optimization:** Conducted end-to-end testing and performance debugging to minimize page load times and ensure optimal user engagement.
- **Version Control & Workflow:** Facilitated efficient deployment cycles by utilizing Git for version control and collaborative code reviews within a team environment.

Bahria Enterprise Systems and Technologies (BEST) | Full-Stack Developer **June 2025 - Present**

- **Architected and Engineered** robust web applications, implementing modern MVC patterns and clean-code principles.
- **Core Programming Logic:** Developed custom backend solutions for specialized authentication systems, including a username-only login architecture to meet unique business requirements.
- **Database Optimization & Management:** Designed scalable schemas and managed data integrity through Eloquent ORM, migrations, and advanced Model Scopes for optimized querying.
- **Advanced Security & Authorization:** Implemented a granular two-role authorization system to ensure strict user data access control.
- **System Modularity:** Created maintainable backend structures using dedicated validation layers and service providers.
- **Custom Backend Logic:** Developed specialized authentication systems, including a username-only login architecture to meet specific application requirements.
- **API Development:** Engineered secure RESTful APIs to bridge complex backend data structures with high-fidelity frontend interfaces.

University Of Karachi, UBIT (Umaer Basha Institute of Information Technology) **Dec 2020 - Jan 2025**

- Face Recognition Attendance Mobile App I developed a mobile application for my FYP that captures real-time attendance via facial recognition. I built the mobile interface using React Native to process the live camera feed and used Firebase as the primary database for real-time data synchronization and user authentication. The app instantly identifies faces and logs attendance by bridging mobile AI detection logic with Firebase's cloud-hosted data structure.

EDUCATION:

BS Software Engineering, University Of Karachi **2025**
Fsc. in Pre Engineering | Bahria College Karsaz Karachi **2020**
MatriculationinComputerScience | BahriaCollegeKarsazKarachi **2018**

CUSTOM WEBSITE PROJECTS E-Planet Global Pakistan

Developed 60+ responsive and interactive websites using modern frontend technologies, ensuring seamless user experience and performance optimization. Proficient in HTML, CSS, JavaScript, and frameworks like React.js and Vue.js. Collaborated with designers and backend developers to implement UI/UX best practices, maintain code efficiency, and optimize web applications for speed and accessibility.

PROJECTS.

- **Iron Eagle Golf:**

Iron Eagles a sleek and modern golf website designed to provide an engaging experience for golf enthusiasts. It showcases key features such as course details, membership options, tournaments, and booking facilities. With a responsive design and intuitive navigation, the site ensures easy access to information while delivering a visually appealing and seamless user experience. **Link**.

- **BUGA AI:**

Buga AI is an advanced artificial intelligence website showcasing innovative AI-powered solutions. It highlights features such as machine learning capabilities, automation tools, and AI-driven analytics. With a modern and responsive design, the site provides users with insights into AI applications, services, and potential integrations, ensuring an informative and seamless browsing experience. **Link**.

- **Toxic Peach:**

Toxic Peach is a dynamic and energetic workout website designed for fitness enthusiasts. It features workout plans, training programs, and fitness tips to help users achieve their fitness goals. With a bold and engaging design, the site offers an intuitive user experience, motivating visuals, and easy navigation for a seamless fitness journey. **Link**.

- **Grand Low Enterprises:**

Grandlow is a premium vacation rental website that helps travelers find and book the perfect stay. With a user-friendly interface and visually appealing design, the site showcases a variety of rental properties, including luxury villas, cozy apartments, and scenic retreats. It offers detailed property descriptions, high-quality images, and seamless booking options to ensure a hassle-free vacation experience. **Link**.

- **Be The Brand:**

Be The Brand is a business optimization website designed to help companies enhance their brand presence and accelerate growth. It offers strategic solutions in branding, marketing, and digital presence to maximize business potential. With a sleek and professional design, the site provides insights into innovative strategies, tools, and services that empower businesses to stand out in a competitive market. **Link**.

- **Exotic Ammo:**

Exotic Ammo is a specialized e-commerce website for purchasing high-quality ammunition. It features a wide range of ammunition options for various firearms, catering to shooting enthusiasts, hunters, and professionals. With a secure and user-friendly interface, the site ensures easy browsing, detailed product descriptions, and a seamless purchasing experience, prioritizing safety and compliance. **Link**.
